

Mock-up of the canonical print · 9 panels (columns) × 7 days (rows) · invented data · rules v1 (draft)

Same sky for all nine: clouds on the 20th, overcast on the 22nd, a cloudy morning on the 23rd. Panel 6 did not wake on the 20th.

63 dials cut as solar cells, corners chamfered, on black: the reverse of a real panel.
